Bachelor of Science (Botany)

Department of Botany

CURRICULUM & PROGRAM STRUCTURE

Purpose of the Program:

Under Choice Based Credit System (CBCS), as prescribed by UGC, Department of Botany has introduced a paper Horticulture in Semester Second. Horticulture is a part of Agricultural Science related to Botany especially deals with vegetables, fruits, flowers crops and landscape architecture. Horticulture includes floriculture, Olericulture and Pomology, which is of great economic value providing employment as well as knowledge of mineral nutrients and vitamins from fruits and vegetables.

Program Outcomes (PO) **(As per Bloom's Taxonomy)**

PO1 - Students can utilize and implement their acquired knowledge in basic and applied aspects in the field of agriculture and plant breeding, herbal medicine, food industry, horticulture, olericulture and pomology.
PO2 – Course structure open avenues for self-entrepreneurship and self-employability for student. Students can initiate from small scale cottage industry to large set ups and generate employment.
